

User:MarkDilley

Can't write on the talk / discussion pages, get a blue spinning wheel. I am using Chrome Version 51.0.2704.103 (64-bit) on a Mac Version 10.11.5 (15F34).

So I put my request here. Wanted to update the side bar @ MediaWiki:Sidebar to link directly to [What is WikiToLearn?](#) instead of [redirect](#) and hit an un-wiki blockade. :-) Interesting project here, look forward to watching it. ~~ [MarkDilley \(talk\)](#)

Hey Mark!

Sorry for the problem, we found a bug on flow and opened a ticket on phabricator. It should be fixed with our next release. It also should work if you try to reload the page.

About the sidebar, thanks for the suggestion, I will ping the Wtl admins!

If you want to get directly in contact with us we have all our communication channels listed on join.wikitolearn.org

Cheers,

[Grigoletti \(talk\)](#) 07:52, 27 June 2016 (UTC)
